FLOOD REMEDIATION EFFORT SEEKS COMMUNITY INPUT

In an effort to address flooding impacts in the Cedar Mill Creek/North Johnson Creek area, THPRD and other partner agencies plan a self-guided tour for affected residents on Thursday, May 10, from 3-7 pm.

Project team technical members will be available at five stations along the tour – including one at THPRD’s Commonwealth Lake and another at the district’s Tualatin Hills Nature Park – to review initial strategies and answer questions. Visiting at least three stations will prepare residents to review and comment on proposed remediation concepts.

Human activity and rain patterns have resulted in more flooding of homes, business, parks and roads within the Cedar Mill Creek and North Johnson Creek watersheds. The Cedar Mill Creek Flood Remediation Collaborative, a partnership of Washington County agencies, businesses and other organizations, seeks to address flooding risks and provide high-quality natural habitat. For more information, visit cedarmillcreek.org.

Oregon Solutions guides this effort by bringing stakeholders together, providing education and information and seeking public input. Find out more at orsolutions.org.

About THPRD

Formed in 1955, THPRD is the largest special park district in Oregon, spanning 50 square miles and serving about 250,000 residents in the greater Beaverton area. The district provides year-round recreational opportunities for people of all ages and abilities. Offerings include thousands of widely diverse classes, 95 park sites with active recreational amenities, nearly 70 miles of trails, eight swim centers, six recreation centers, and 1,500 acres of natural areas. For more information, visit www.thprd.org or call 503-645-6433.
