

**LEGEND**

- Project Boundary
- Vegetated Corridor Buffers
- Outer 40% of Vegetated Corridor That Falls Within Project Boundary
- Sanitary Sewer Line
- Storm Line
- Sanitary Sewer Manhole
- Storm Manhole
- Delineated Wetlands
- Delineated Streams
- Access Points
- Deciduous Tree
- Evergreen Tree
- Defined / Cleared Utility Corridor (Trail Opportunity)
- Significant Stands of Blackberry That May Conflict With Proposed Trail Alignments
- Trees of Low Value
- Proposed Alignment @ 5% or Less Running Slope
- Proposed Alignment @ 5%-10% Running Slope
- Elevated Pathway (Boardwalks / Bridges)

IN ORDER TO TRANSITION TRAIL THROUGH STEEP SLOPE (+16' ELEVATION DIFFERENCE) A SWITCH BACK WILL BE REQUIRED. IT WILL ALSO REQUIRE SIGNIFICANT IMPACT TO THE WETLAND AND/OR VEGETATED CORRIDOR BUFFER.

EXISTING 11' ASPHALT PATH WILL BE REPLACED WITH TRAIL. HORIZONTAL ALIGNMENT WILL REMAIN THE SAME. VERTICAL ALIGNMENT AND WIDTH MAY BE ADJUSTED.

ALIGN SWITCH BACK TO AVOID WATER QUALITY SWALE AND SEWER UTILITIES.

THE PREFERRED ALIGNMENT FOR THE PROPOSED TRAIL IS TO FOLLOW EXISTING BOARDWALK UNTIL IT CROSSES WILLOW CREEK. ONCE IT CROSSES THE CREEK AN ALIGNMENT WILL BE CHOSEN THAT COMPLETES THE TRAIL SEGMENT TO THE NORTH IN THE SHORTEST, LEAST INTRUSIVE MANNER.

GOOD CONNECTION POINT TO EXISTING PATH

6' BOARDWALK W/ 6'-6" WIDE CONCRETE BRIDGE ABUTMENT

18" RAILING ALONG MOST OF BOARDWALK (SEATING)

ROUGH CURVES IN BOARDWALK. PROPOSED BOARDWALK WILL PROVIDE SMOOTHER ALIGNMENT.

SOCCER FIELD (IPROD PROPERTY PER NO. 91011703)
